---

NBA is a long-running basketball game, and its 2k20 edition is on the way. We don't know too much about NBA 2k20 but there a few details that we have. Let's talk about this highly anticipated game. This year the pre-orders will start on all platforms. Here we will talk about its the release date, platforms, edition, and other features of the game. However, a tweet came in front of the audience from the basketball star Renee Montgomery that hints may be NBA 2k20 is debuting.

NBA 2K19 was heavily criticised by fans for introducing microtransactions, which required players to spend real life money to unlock parts of the game, unless they were willing to spend hours playing to unlock them. It is hoped by many that these are removed in the next game. At present little is known about the new game, but more details should be revealed in the coming weeks. Not even which player will feature on the box art is yet known, but there are plenty of candidates rumoured to be given the honour.

NBA 2K20 is somewhat of an unknown quantity at this point in time, since it hasn't even been announced yet - so speculating about new features is guesswork at best. Looking back on 2K19, key features were the aforementioned new storyline for career mode as well as refinements to gameplay within the mode such as "Takeover" - boosting attributes for players on a hot streak.

MyTeam also got some new additions, such as being able to create your own player. MyTeam is 2K's version of EA's Ultimate Team Mode. Unfortunately, NBA 2K19 was let down by a disappointing raft of microtransactions which meant considerable amounts of gear and attributes were hidden behind huge stretches of grinding - unless players are willing to part with their cash.

2K Sports typically releases a short demo of the next NBA 2K game ahead of the release date. The demo is called The Prelude and it lets players try a portion of the game early. Typically, the Prelude goes live a few days before the official release date. Last year, the NBA 2K19 Prelude arrived in late August just ahead of the release in September. You can expect the NBA 2K20 Prelude to go live somewhere in the same time frame. It should also be a free download for all platforms.
